I remember.. I used to play on DoWhatEver which was equally as awful if not worse. Now I just visit small servers and SE the owner if they are so bad at what they do that it's for their sake that their server comes to an end. Sure it may be a very rude thing to do and sometimes a traumatizing experience if they have an emotional attachment to something on there but I tend to legitimately help the servers out until the admins show me that they are unfit to run a server.

Truly, I do the MC community a great service by reducing the cancer on MC server lists. 🤞
(of course if it's a very small server of just a couple innocent people i will respect them, i only mess with those who deserve it)

I've been in the community since around the end of 2012

Okay...? Now grief the server as an admin ._. OP made the server look like total shit and you guys aren't even denying it ._.

I logged in and was made OP. This is beautiful.

Edit 1: Server crashed and came back on after about a minute. It was on about 2 minutes before some admin (probably) closed the server.

Edit 2: Back up.

Just keep doing "/ci *" and "/playsound mob.wolf.howl @a ~ ~ ~ 1 2 1" to piss everyone off.
